

ONE SERVER HOSTING UNLIMITED WEBSITE HOSTING

WWW.ONESERVERHOSTING.COM/HOSTING

One Server Hosting's Shared Hosting is the perfect solution for any small business website that needs a complete toolbox of web design features. You can manage all aspects of your site using the One Server Hosting control panel, and you can use the QuickBuild plugins to quickly deploy new site content and features.

ONLINE CONTROL PANEL & SITEBUILDER

One Server Hosting's control panel has an intuitive interface which is task oriented and fully customizable with the Control Panel Desktop feature. The One Server Hosting Shared Hosting control panel is designed to simplify the management and administration of websites. One Server Hosting's new SiteBuilder software is an easy to use web application designed to create and manage websites. The new SiteBuilder includes many new templates and features.

Easy-to-Use Web Interface

Five-step point-and-click wizard that includes design and layout templates, page structure, sample text and a powerful interface editor so you can focus on your business instead of learning how to make websites.

100s of Templates and Features

Hundreds of sophisticated templates included in combination with advanced statistics, image controls and a powerful WYSIWYG editor.

Designed for Your Business

Provides an assortment of skins to integrate with your site control panel and modify look-and-feel for private branding.

QUICKBUILD PLUGINS

Need a quick image gallery setup? Your customers want to interact with you via a forum site? Need a quick WordPress blog site setup? No problem, there is a QuickBuild plugin for these and many more web based application needs, all at no extra cost! Our QuickBuild library is extensive and has a plugin for a multitude of small business needs. One Server Hosting's QuickBuild library includes these and many more:

- Small business professional applications like eGroupWare, dotProject, DotNetNuke and more
- WordPress, geeklog and other popular blog applications
- Several of the most common Wiki web-based applications
- Gallery and Coppermine image gallery applications
- Drupal, Joomla, Typo3 and other web portal applications
- OsCommerce, and other e-commerce applications
- Online Forum applications such as phpBB and SMF

NETWORK CONNECTIVITY & EQUIPMENT

Your website will be hosted within one of our state-of-the-art data centers in western Washington. These sites have fully redundant power and generators, HVAC and fiber connectivity. The data centers have multiple GigE connections to the Internet for fast and extremely reliable connectivity.

REDUNDANT DNS SERVERS

Domains that are hosted on One Server Hosting Shared Hosting servers utilize our group of fully redundant DNS servers to maintain both high reliability and high-speed domain lookups for your web and email addresses. All domains that we host are eligible to use One Server Hosting's DNS servers.

UNLIMITED MEANS UNLIMITED

One Server Hosting understands the Internet needs of your growing small business, which is why we don't "nickel-and-dime" you for every feature and convenience. We do not cap your bandwidth, or storage, nor do we limit your use of available options like our QuickBuild Plugins. Once your online presence reaches the point where it has outgrown Shared Hosting requiring more options, or faster services, One Server Hosting will be there to help you determine which One Server Hosting solution is best for your company's next move.

UNLIMITED SHARED HOSTING INCLUDES:

- Unlimited Disk Space
- Unlimited Bandwidth
- Unlimited Sub-Domains
- Unlimited Use of SiteBuilder Tools
- Unlimited MySQL Databases
- Unlimited QuickBuild Plugins
- 1 Free Domain Name Registration for the Lifetime of the Account
- All hosted on Linux-Based Dell PowerEdge Server
